PROFESSIONAL SUMMARY

Project manager with 5 years driving cross-functional delivery for Fortune 500 clients, including a PepsiCo equipment services engagement through Kearney and an enterprise AI portfolio for Cummins. CAPM certified with a Purdue MS in Business Analytics (STEM), working in Agile delivery, SQL, Python and Power BI to keep scope, schedule and risk decisions grounded in data.

PROFESSIONAL EXPERIENCE

Cummins West Lafayette, IN
Portfolio Teaching Assistant, Analytics & AI, The Data Mine, Purdue Sep 2026 - Present

- Directing the enterprise AI portfolio for Cummins' Analytics and Artificial Intelligence group as the primary interface between Purdue and Cummins across 10 use cases and 4 project divisions, owning the governance and delivery cadence behind workstreams that replace manual Digital Core onboarding.

Kearney United States (Remote)
Analytics Consultant, PepsiCo Engagement, Purdue Practicum Jan 2026 - Present

- Delivered every phase of a multi-phase PepsiCo engagement on schedule by owning scope definition, delivery cadence, action tracking and risk escalation alongside Kearney advisors, redirecting repair-versus-replace decisions across a 30K+ unit fleet
- Built the KPI baseline PepsiCo leadership now uses for service cost decisions, writing SQL joins, CTEs and window functions and escalating OEM underperformance and a diagnostic miss rate found across 150,000+ service work orders

Purdue Research Foundation, Office of Investments West Lafayette, IN
Coordination Lead, The Data Mine, Purdue Aug 2025 - Present

- Ran the operating cadence, dependency reviews and action logs across Database, Parsing, API, Front End and Finance sub-teams, replacing the Office of Investments manual investment reporting with automated pipelines

LearnOBots Islamabad, Pakistan
Senior Business Analyst May 2022 - Nov 2024

- Owned delivery of the customer profitability and program-ROI analysis that reset quarterly go-to-market strategy, covering 78+ converted accounts and \$250K+ in tracked revenue
- Forecast enrollment and staffing demand for leadership planning capacity on intuition, lifting planning accuracy by 30% and replacing guesswork in headcount decisions across 3 program lines

Metro Security Pvt. Ltd. Islamabad, Pakistan
Business Analyst Apr 2019 - Jul 2021

- Standardized pricing across a Fortune 500 tender pipeline that quoted inconsistently, building Excel cost models with scenario toggles for RFP and RFQ analysis, cutting bid-preparation time by 40% on bid wins exceeding \$1.2M with Coca-Cola Pakistan and British American Tobacco.

Schlumberger (SLB) Islamabad, Pakistan
Procurement Analyst Intern Jun 2017 - Sep 2017

- Benchmarked multi-vendor sourcing data for a global oilfield services operation with no competitive baseline, evaluating supplier capability against technical and commercial criteria and building stock, order and lead-time models that replaced manual demand tracking.

British American Tobacco Islamabad, Pakistan
Talent Acquisition Intern Jun 2015 - Oct 2015

- Ran early careers recruiting operations end to end for a function reliant on manual workflows, delivering 40 assessment centres, training programs and campus career fairs and scoping the vendor requirements for a centralized candidate database that replaced manual candidate tracking.

EDUCATION

Purdue University, Mitchell E. Daniels Jr. School of Business West Lafayette, IN
M.S. Business Analytics & Information Management, Information Management Specialization (STEM) Aug 2025 - Dec 2026

Relevant Coursework: IT Project Management, AI for Business, Foundations of Artificial Intelligence, Spreadsheet Modeling & Monte Carlo Simulation, Statistical Modeling, SQL for Analytics, Machine Learning, Data Management

National University of Sciences and Technology (NUST) Islamabad, Pakistan
Master of Business Administration (MBA) 2015 - Dec 2017

PROJECTS

E-Commerce Price Dynamics

- Quantified which technical specifications move market valuation by running statistical hypothesis tests in Python, producing evidence-based pricing and positioning recommendations across 100,000+ product records.

Financial Risk Prediction

- Ensembled XGBoost and LightGBM with SMOTE resampling and L1/L2 regularization on severely imbalanced financial data, reaching AUC 91.7% and ranking the drivers behind each score.
